NAAC ACCREDITED - 2016

Ref.:

Date

Methodology for PO-CO Attainment

Step I: Select a Programme (e.g. Mathematics General)

Step II: Find the Programme Outcomes

(Sample: After the completion of B.Sc. (General) in Mathematics, Students will be able to

PO 1: Develop the basic logic to think about the practical problems.

PO 2: Develop mathematical skills to solve problems in various branches of mathematics

PO 3: Appreciate the role of mathematical proof in formal deductive reasoning

PO 4: Inculcate the ability to think independently

PO 5: Demonstrate the ability to analyze data and draw appropriate statistical conclusions.

PO 6: Demonstrate the ability to apply analytical and theoretical skills to model and solve mathematical problems.

PO 7: Recognize and appreciate the connections of mathematics with other branches of science.)

Step III: Find the Course Outcomes of a particular Course

[Sample : CO 1: Have an idea about a function from an algebraic, numerical, graphical and verbal perspective and extract information relevant to the phenomenon modeled by the function.

CO 2: Understand the meaning of limit, continuity and differentiability and partial derivative of a function

CO 3: Derive the value of the limit, continuity and differentiability of a function at a point using their respective definitions

CO 4: Understand the difference between the limit and continuity of a function at a point.

CO 5: Interpret the geometrical and theoretical concepts of mean value theorems

CO 6: Represent a function using infinite series.

CO 7: Understand the application of ordinary and partial derivatives of a function.]

NAAC ACCREDITED - 2016

Ref.:

Date

Step IV: Tagging COs with Pos

Step V: Procedure for attaining COs and Pos

[Course outcomes will be attained through direct and indirect methods.

- Direct Attainment: We will consider the following criteria in the direct attainment
- Internal tests will be conducted based on COs
- Class performance activities consisting of assignments / tutorials/experiments/quiz/any other activity related to COs will be conducted
- External exam marks will be considered.
- Indirect Attainment: In this method, we consider the feedbacks of students, parents, alumni and parents on the framed questionnaires.

Note : [Feedback link](#) for CO. It will be taken after each semester]

Step VI: Choose Target Levels for the courses

Levels	Average Percentage Levels
Low (1)	greater or equal to 40% - less than 50%
Moderate (2)	greater or equal to 50% - less than 60%
High (3)	greater or equal to 60%

- Target level for attainment of COs will be set based on average marks of that course in the previous academic year.
- Attainment Level Calculation for each CO= 80% of direct level +

20% of indirect level of that CO

NAAC ACCREDITED - 2016

Ref.:

Date

Step VII: Attainment of Course Outcomes

Step VIII: Setting CO Attainment Targets

- Same target (all the COs of a course) “class average marks > 60 marks”
- Targets set in terms of performance levels of different groups of students.

NAAC ACCREDITED - 2016

Ref.:

Date

(Sample)

Course	CO attainment level	CO Attainment 80% of A + 20% of B	Attained or Not attained	Action Taken
Differential Calculus	3	2.2	Not Attained	Set Target Level 2
Differential Equations	2	2.2	Attained	
Real Analysis	2	3	Attained	
Algebra	3	3	Attained	
Matrices	3	2.8	Not Attained	More focus on End Sem Exam
Linear Programming	2	3	Attained	
C Programming Language	3	3	Attained	
Logic and Set	3	2.2	Not attained	More focus on Internal Exam

Step XI: PO Attainment through CO

- Program outcomes will be attained through direct and indirect methods.
- Direct Attainment: We will consider all the courses which are mapped to a particular PO. Then the direct attainment value will be calculated based on the following formula:

Direct PO (i) attainment

$$= \frac{\sum \text{no of COs of any Course attained to PO (i)} \times \text{Attainment level of the course}}{\sum \text{no of COs of all courses attained to PO(i)}}$$

- Indirect Attainment: In this method, we consider the feedbacks of students, parents, alumni and parents on the framed questionnaire:

Feedback CO Sem 6		CO Feedback Question Nos.																							
Sl. no.	Timestamp	Your Name	Father / Mother's Name	Mobile Number (Preferably WhatsApp)	Year of Admission to the English Honours programme	Year of Completion of Programme (Passing Out)	Do you recognise the role of theatre and drama in the introduction and shaping of modernity?	Do you understand and engage with concepts like realism, naturalism, symbolism, introduced into the theatre of the Avant Garde, the epic theatre, the nineteenth and the twentieth century?	Do you understand how meaning is created in theatre and are you also able to write about innovations introduced into the theatrical practice in the late nineteenth and the twentieth century?	Do you now understand the scope of postcolonial literatures in India and elsewhere, primarily as a response to the long shadow of colonialism, not just of colonial occupation?	Can you see through a corpus of representative postcolonial texts from different colonial locations / countries: the effects of colonial rule on the economy and habitat of specific groups of people affected by it?	Can you now appreciate and analyze the growing spectres of inequality arising out of colonial occupation and the role played by postcolonial literatures to resist it in India during and after colonial occupation?	Can you critically engage with issues of racism and imperialism during and after decolonisation, region, race, identity politics, etc.??	Do you think you have received a sound historical overview of major literary theorists, especially of the 18th, 19th and 20th centuries?	Are you now able to understand various literary theories and the way they enrich and change our way of thinking about language, literature and society?	Can you historically situate literary theorists whose works have informed and shaped various literary movements with which they are associated?	Can you now apply various theoretical frameworks and concepts to your assessment of literary and cultural texts?	Has this course sharpened interpretative skills in the light of various theoretical frameworks?	Can you now explain historical and socio-cultural factors responsible for the Partition of the Indian Sub-continent?	Can you demonstrate a critical understanding of the experience of the partition in various art forms?	Can you now link and analyze the eco-socio-historical-cultural contexts and dimensions related to the Partition of India e.g. nationalism, violence, exile, homelessness, refugee, rehabilitation, resettlement, border and border lands, literary responses to the partition of India and interpret their contexts and the experiences?	Have you received a fair amount of knowledge and understanding about the state of women during and after Partition?

DEPARTMENT: MATH

PO-CO Attainment
Department of Mathematics
P.N. Das College, Palta

Programme Outcomes:

It describe what students are expected to know and would be able to do by the time of graduation. These relate to the skills, knowledge, and behaviours that students acquire as they progress through the program.

After the completion of B.Sc. (General) in Mathematics, Students will able to

- PO 1: Develop the basic logic to think about the practical problems.
- PO 2: Develop mathematical skills to solve problems in various branches of mathematics
- PO 3: Appreciate the role of mathematical proof in formal deductive reasoning
- PO 4: Inculcate the ability to think independently
- PO 5: Demonstrate the ability to analyze data and draw appropriate statistical conclusions.
- PO 6: Demonstrate the ability to apply analytical and theoretical skills to model and solve mathematical problems.
- PO 7: Recognize and appreciate the connections of mathematics with other branches of science.

Course Outcomes:

Semester-I [Core Paper] Topic: Differential Calculus

Course outcome: After successful completion of the course, Students will be able to:

- CO 1: Have an idea about a function from an algebraic, numerical, graphical and verbal perspective and extract information relevant to the phenomenon modelled by the function.
- CO 2: Understand the meaning of limit, continuity and differentiability and partial derivative of a function
- CO 3: Derive the value of the limit, continuity and differentiability of a function at a point using their respective definitions
- CO 4: Understand the difference between the limit, continuity and differentiability of a function at a point.
- CO 5: Interpret the geometrical and theoretical concepts of mean value theorems
- CO 6: Represent a function using infinite series.
- CO 7: Understand the application of ordinary and partial derivatives of a function.

Semester-II [Core Paper] Topic: Differential Calculus

Upon completion of this course, students will be able to

- CO 1: Incorporate a family of curves with its differential equation and will be able to find the differential equation of a given family of curves.
- CO 2: Be familiar with concepts of order, degree of a differential equation and able to distinguish between linear, nonlinear, ordinary and partial differential equations.
- CO 3: Acquainted with various methods for solving mainly first order and second order ordinary and partial differential equations.
- CO 4: Interpret the difference between general solution and particular solution.
- CO 5: Understand the applications of differential equations.

Semester-III [Core Paper] Topic: Real Analysis

After successful completion of the course the students will be able to:

- CO 1: understand the number system and point set theory
- CO 2: know the basic postulates of real numbers and gain the idea about the basic properties of real numbers
- CO 3: get the knowledge of Sequence and Series of real numbers
- CO 4: recognize the difference between pointwise and uniform convergence of sequence and series of functions.
- CO 5: illustrate the effect of uniform convergence on the limit function and sum function with respect to continuity, integrability and differentiability.
- CO 6: familiar with concepts of power series, radius of convergence and illustrate properties and convergence of power series.

Semester-IV [Core Paper] Topic: Algebra

Upon successful completion of the course the students will be able to

- CO 1: gain the basic knowledge of the concepts of sets, relations and acquire knowledge of the concepts mappings and their types.
- CO 2: gain working knowledge of important mathematical concepts like groups and subgroups
- CO 3: compare the known algebraic structure with their abstract idea.
- CO 4: have knowledge of many mathematical concepts studied in abstract algebra such as Permutation groups, Abelian groups, Cyclic groups and normal subgroups
- CO 5: Gain knowledge of homomorphism of groups, learn Isomorphism theorem and apply them to problems.
- CO 6: introduce to the mathematical concepts of rings, zero divisors, Integral domains, fields and their properties.

Semester-V [DSE] Topic: Matrices

Upon completion of the course, students will be able to

- CO 1: acquire the idea of representing a system of equation in matrix form and its advantages, the process of matrix operations, matrix transformation, the knowledge of eigen values and eigen vectors and their application.
- CO 2: determine the determinant of a square matrix and rank of a matrix and solve related problems along with matrix representation of a linear transformation relative to ordered bases of finite dimensional vector spaces
- CO 3: solve a system of equations by using the idea of matrices.
- CO 4: apply matrices in geometry, physics, chemistry and combinatorics
- CO 5: acquainted with the idea of vector spaces over the real field, linear transformations, null space, range space.
- CO 6: Learn change of basis theorem and apply them to problems.

Semester-V [Alternative DSE] Topic: Mechanics

After successful completion of the course the students will be able to

- CO 1: acquire idea about the equilibrium of a particle of coplanar forces acting on a particle, rectilinear motion of particles, velocity and acceleration analysis of mechanics using vector analysis approach, the laws of friction and to calculate the amount of friction acting on a body
- CO 2: gain the idea of forces acting on a particle moving on a plain curve or a space curve.
- CO 3: Apply Equation of motion using Newton's laws to particles and rigid bodies.
- CO 4: understand about the type of forces, work, power and energy
- CO 5: understand the idea of centre of gravity of a particle.
- CO 6: use the concept of projectiles and solve related problems.

Semester-VI [DSE] Topic: Numerical Methods

After taking this course, the student should be able to

- CO 1: gain the idea of error of approximation along with the approximation rules, interpolation and its application in predicting different phenomenon described by a function.
- CO 2: use different interpolating polynomial viz. Newton's formula, Lagrange's formula, Stirling and Bessel's polynomial in different situations, numerical differentiation formula, the technique to solve differential equations numerically
- CO 3: find numerical integration formula viz. Trapezoidal formula, Simpson's one-third formula.
- CO 4: acquire idea about iteration method and its convergence.
- CO 5: find some methods viz. bisection method, method of false position, method of fixed point iteration method, Newton's method, Secant method for solving an equation numerically upto certain degree of accuracy.
- CO 6: use several available methods to solve the simultaneous equations.

NAAC ACCREDITED - 2016

Ref.:

Date

Outcome 1 (Information/IT) : Basic Level Programming
 After taking the course, the student should be able to:
 CO1: Write and execute the basic programming and write concerning basic operations on a basic programming
 CO2: Formulate problem statements in the form of an I/O
 CO3: Analyze the ability and its requirement for the various of basic programs.
 CO4: Use the basic logical method to solve basic programs and prove its correctness in a suitable
 CO5: Generate clear program theory, ready run program and run, give with suitable print or without suitable print
 CO6: Explain the physical and mathematical logic towards given problem

Outcome 2 (IT) : Basic level course) : System Programming language
 Upon completion of the course, students will be able to:
 CO1: Explain the fundamental concepts of formats and offsets.
 CO2: Explain the knowledge of address, instruction, the binary, decimal, and hexadecimal and will be able to explain the conversion.
 CO3: Explain the knowledge of algorithms and flowchart and will study that usage in problem.
 CO4: Handle with basic knowledge of high level language, computer organization
 CO5: Explain the relationship between knowledge of programming and I/O
 CO6: Explain the basic problem in programming I/O.

Outcome 3 (IT) : Basic level course) : Logic Design and Gate
 After completion of the course students are expected to be able to:
 CO1: Give the fundamental logic and will be able to explain boolean with meaning
 CO2: Analyze logic operations in truth table.
 CO3: Draw truth table and logic using mathematical solution.
 CO4: Generate clear problems and simplify, and perform operations and gates in sets.
 CO5: Identify applications and partial order relation, and formal a properties of relation.

Procedure for CO-PO Attainment

CO Attainment Process

- Course outcomes will be obtained through direct and indirect methods.
- CO attainment will be consider the following criteria in the direct attainment
 - Term internal tests will be conducted based on COs
 - Class performance activities consisting of assignments / tutorials/ experiments/ quiz/ any other activity related to COs will be conducted
 - External exam marks will be considered.
- Indirect Attainment in this method, we consider the feedbacks of students, parents, alumni and parents or the formal questionnaires.
- Self-Reflection for the COs will be taken after each semester.

Attainment for Course Outcomes

Target Level:

Level	Average Percentage
Low (L)	greater or equal to 50% less than 60%
Medium (M)	greater or equal to 60% less than 75%
High (H)	greater or equal to 75%

- Target level for attainment of COs will be set based on average marks of that course in the previous academic year.
- Attainment level Calculation for each CO= 80% of direct level + 20% of indirect level of that CO

Setting CO Attainment Targets

- Targets set in terms of performance levels of different groups of students.

Course	CO attainment level
Information Technology	1
Engineering Graphics	1
Mathematics	1
Physics	1
Chemistry	1
English	1
History	1
Political Science	1
Computer Science	1
Biotechnology	1
Environmental Science	1
Health and Physical Education	1
Art and Culture	1

PO Attainment Process through CO

- Program outcomes will be obtained through direct and indirect methods.
- Direct Attainment: We will consider all the courses which are mapped to a particular PO. Then the direct attainment value will be calculated based on the following formula:

Direct PO Attainment

Website : www.pndascollege.in

NAAC ACCREDITED - 2016

Ref.:

Date

$$= \frac{\sum \text{no of COs of any Course attained to PO (i)} \times \text{Attainment level of the course}}{\sum \text{no of COs of all courses attained to PO(i)}}$$

Indirect Attainment: In this method, we consider the feedbacks of students, parents, alumni and parents on the framed questionnaires.

PO attainment Levels

Level	PO attainment range
1 (Poor)	$0.5 \leq \text{PO attainment value} < 1$
2 (Average)	$1 \leq \text{PO attainment value} < 1.5$
3 (Good)	$1.5 \leq \text{PO attainment value} < 2$
4 (Very Good)	$2 \leq \text{PO attainment value} < 2.5$
5 (Excellent)	$2.5 \leq \text{PO attainment value} \leq 3$
